Professional Summary

Full Stack Developer with 2 years of experience building scalable web applications across frontend (Angular, Next.js) and backend (Java Spring Boot, Node.js) domains. Proven track record in microservices architecture, REST API development, and delivering production-grade features in fast-paced environments. Experienced in working with cross-functional teams.

Technical Skills

Languages: Java, HTML, CSS, JavaScript, TypeScript, SQL, Dart

Technologies: Spring Boot, Angular.js, Next.js, React.js, Node.js, Express.js, jQuery, Bootstrap, Tailwind CSS, Kafka, Flutter, Firebase, MongoDB, MySQL, REST APIs, Kibana, Kubedash, Zoho

Concepts: Microservices Architecture, MVC Architecture, API Design, SEO

Tools: Git/GitHub, VS Code, IntelliJ IDEA, Postman, DBeaver, Android Studio

Experience

Blu Parrot Ventures Pvt. Ltd . Feb 2026 – Present

Full Stack Developer | Gurugram, Delhi NCR

- Developing and maintaining full stack web applications using React.js/Next.js on the frontend and Node.js/Spring Boot on the backend.
- Building and optimizing RESTful APIs and integrating to the Frontend and workflows.
- Collaborating with design and product teams to deliver responsive, user-friendly interfaces.
- Writing clean, well-documented code following best practices and participating in code reviews and deployment activities.

Samrish Technologies Pvt. Ltd. Mar 2023 – Nov 2025

Software Engineer 1 | Delhi

- Promoted from Intern to Software Engineer I within the first engagement cycle for consistently delivering high-quality features.
- Deputed to **Rally OurBus (USA)**, developing core backend services using **Java, Spring Boot, and MVC architecture**, and designing RESTful APIs serving multiple client applications with high availability and performance.
- Designed and maintained RESTful APIs serving multiple client applications, ensuring high availability and performance.
- Implemented Kafka-based asynchronous communication between microservices, improving system decoupling and scalability.
- Wrote and executed database migration scripts to support schema changes across releases.

Projects

MediaChat AI (AI-Powered Multimedia Chatbot) | Java, Spring Boot, Google Gemini API, MySQL, React

- A modern, AI-powered chatbot that lets users upload PDF documents, audio files, and video files, get instant summaries, and have natural conversations about the content by Google Gemini on the backend.
- Built a full-stack AI chatbot application using **Java** and **Spring Boot (MVC)**, integrating **Google Gemini's multimodal API** to process and analyze **PDF, audio, and video** files through **RESTful** endpoints.
- Designed and exposed **REST APIs (/api/transcribe, /api/pdf/summary, /api/chat)** to handle **file uploads, AI-generated** summaries, and contextual **Q&A**.
- Implemented **JPA/Hibernate** with MySQL to persist uploaded file metadata (including raw bytes) and full conversation history, enabling seamless session continuity across user interactions. .

Education

Guru Gobind Singh Indraprastha University July 2021 – July 2024

B.Tech in Computer Science & Engineering | CGPA: 8.9 | Delhi
